

CSC110 Assignment 0: Submitting a Java file to Connex

How to hand it in:

Submit a file named **Introduction.java** through the Assignment 0 link on the CSC110 connex site.

Learning outcomes:

When you have completed this assignment, you should understand:

- How to design, compile, and run a simple and complete Java program
- How to attach and submit a .java file on the connex site.

Part 1 – Introduce yourself

Create and new java file called **Introduction.java**. In the main method of this program, write a println statement that outputs, “Hello, my name is <your name here>”. Save, compile, and run this program and make sure there are no errors and the statement is output correctly. When this is done, submit the Introduction.java file on the connex website.

Grading:

This assignment will not be graded.
